TIPS&TRICKS

How to de-clutter your kitchen cupboards and pantry

1. Schedule times (twice a year) where you go through your cupboards, drawers and pantry. Empty and clean them.
2. Organize under-sink cupboards with little baskets for dishwashing liquid, cloths, brushes, plastic gloves etc.
3. Divide your drawers with compartments for easy storage and sorting cutlery, kitchen accessories and other stuff you store in your kitchen.
4. Go through your pantry on a regular basis. If you refill your pantry, check the expiry date of products that are sitting there several months now and dispose of them immediately, if they are expired.
5. Group similar products, e.g. baking ingredients, pasta, rice and sauces, muesli and breakfast cereals, biscuits and crackers, and use small storage baskets for smaller items.
