TIPS&TRICKS

How to fold a fitted sheet

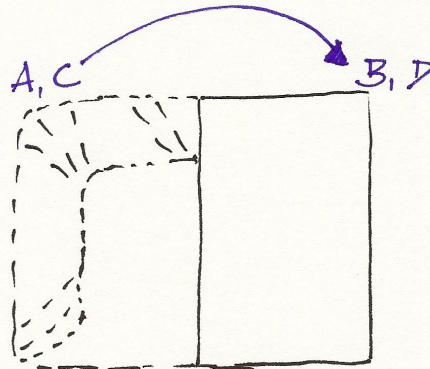

Tip: Work on a large flat surface.
Begin by laying your fitted sheet as shown in Step 1

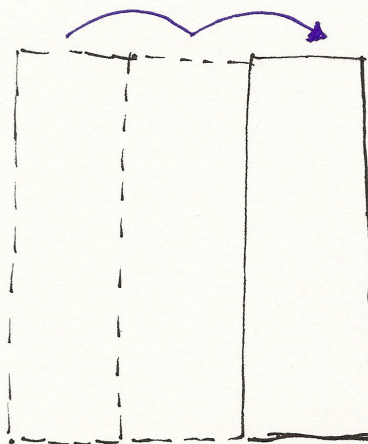

Step 1: Lay fitted sheet with the elastic facing up.

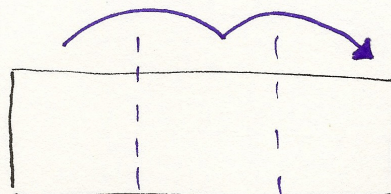

Step 2: Match the corner seams
Turn corners C and D inside out and tuck corner C into A and D into B. Neaten the corners and edges to make a nice rectangle.

Step 3: Fold sheet in half hiding the elastic.

Step 4: Fold sheet into thirds forming a long rectangle.

Step 5: Fold sheet into thirds again creating a square, and you're done!
