

# Downsize with Style

## TIPS&TRICKS

### The art of styling vignettes

#### **1. Tell a Story with the Things You Love**

Use what you have and things you love.

#### **2. Play with Height and Depth**

Build a composition that helps the viewer to follow your ideas and guides them along your arrangement.

#### **3. Use Books and Flowers**

Build stacks of books and place an object on top of the books. Add fresh flowers, branches or a pot plant to create an organic look.

#### **4. Integrate Art**

Use a painting, photograph or a sculpture to make your display more interesting.

#### **5. Work with Trays**

Place different objects on a tray and they look instantly organised and sorted.

#### **6. Use the Power of Colour**

Either keep your vignette fairly neutral, and add splashes of your interior's accent colour, or use one main colour throughout your entire display.

#### **7. Trust Your Gut Feeling**

There are no wrong vignettes if you follow the tips above. A vignette is a very personal way of displaying your treasured objects and favourite things.
