More and more Australian homeowners are preferring an urban lifestyle close to infrastructure and amenities. The Astonia Residences, located in Milsons Point on Sydney's North Shore, is a boutique development of eight apartments catering to this preference while also providing a sense of luxury and spaciousness.

Designed by Nettleton Tribe, the apartments feature signature-look bathrooms that include elegant design solutions from sanitary products specialist Geberit.

Each apartment is significantly larger than is standard for the area and has at least three deluxe bathrooms, along with at least three bedrooms and three car spaces. Gosia Piotrowski, head of Nettleton Tribe's interiors division, says the apartments are designed to maximize living space. "The apartments have a

magnificent vista across Lavender Bay with Harbour Bridge views, and our brief was to open up the interior living areas to capitalize on the breathtaking panorama," she says.

Optimizing the living spaces didn't mean compromising in other areas such as the bathrooms, however. Gosia says she and her team were excited about the opportunity to create a new level of luxury in the bathrooms with Geberit's Swiss, quality concealed cisterns. "Geberit concealed cisterns offer greater design flexibility when planning the bathrooms," she says. "We were able to maximize space and to choose the pan we felt best suited our overall design."

Geberit offers unique design choices, with an extensive range of sophisticated and elegant button designs and finishes to complement the look of any contemporary bathroom.

"We chose Geberit Sigma01 buttons because of the organic look," says Gosia. "We also chose Geberit concealed cisterns for the smaller bathrooms and powder rooms in the Astonia development to achieve clean lines and uninterrupted tiling as a signature feature in these spaces."

Geberit cisterns offer architects and designers the freedom to select either mechanical or pneumatic flush options. The cisterns can also be matched with a vast range of pans, including back-to-wall and wall-hung. Plus, they offer the choice to hide the cisterns in vanity hobs and even in ceilings, with a button placement of up to three metres from the pan. Geberit cisterns are also water efficient, with options that carry a 4-star WELS rating.

Ideal for the discerning homeowner, Geberit concealed cisterns and buttons offer elegance, design flexibility and Swiss quality. **GEBERIT**
